The Expert Reviewer Guide

The Expert Reviewer user role on the R2 Digital Library helps librarians leverage the collective knowledge of expert colleagues – including faculty and departmental leaders along with medical and nursing professionals – as they consider resources to add to their collections.

Getting Started

Expert Reviewer status is granted by the R2 Digital Library Institutional Administrator. It can be requested by users when they create an individual account and also assigned as Institutional Administrators create accounts.

Expert Reviewers can search, browse and use content in the same manner as an R2 Digital Library user. In addition to the capability outlined below, Expert Reviewers are able to create and maintain Reserve Shelf Lists.

Please note that “Department” is a required field for Expert Reviewer user profiles.

Recommending Resources

Once an Expert Reviewer has logged in with a user name and password, the tabbed navigation along the top of the page will display an “Expert” option.

Upon clicking the “Expert” tab, the Expert Reviewer will be able to recommend resources for purchase, review resource lists as requested by Institutional Administrators and create and manage reserve shelves.

An Expert Reviewer can view resources available on the R2 Digital Library by selecting any of the following along the left navigation bar:

- Recommend eBooks (all resources available on the R2 Digital Library)
- Featured Titles
- Featured Publisher
- Clinical Cornerstones
- Noteworthy Nursing

To navigate these resource groups, Expert Reviewers can use the Search, Tools and Sort and Filter options along the top of the page.

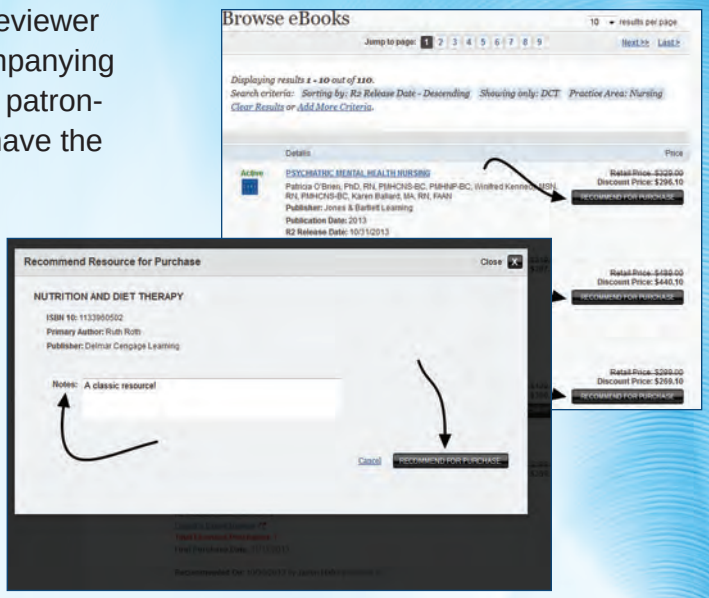
The Expert Reviewer Guide

To recommend a resource for acquisition, an Expert Reviewer can click the “Recommend for Purchase” button accompanying any title not owned by their institution. (Purchased and patron-driven acquisition resources are displayed but do not have the “Recommend for Purchase” button.)

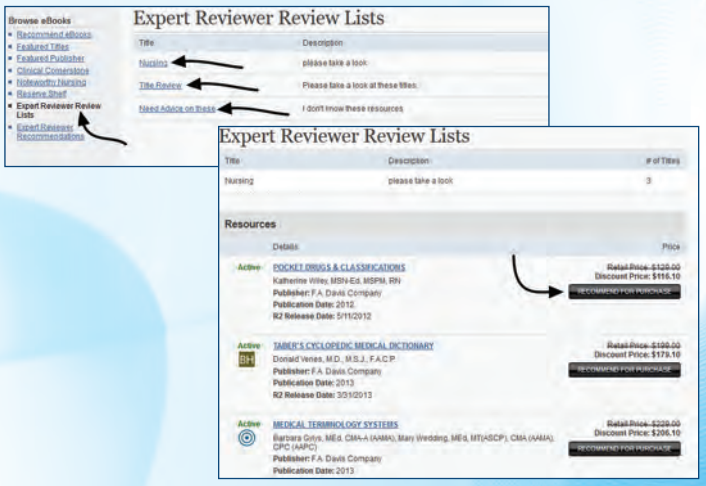
Upon clicking the “Recommend for Purchase” button, the R2 Digital Library will present the Expert Reviewer with a confirmation pop-up. At this time, the Expert Reviewer may add a note prior to submitting a recommendation.

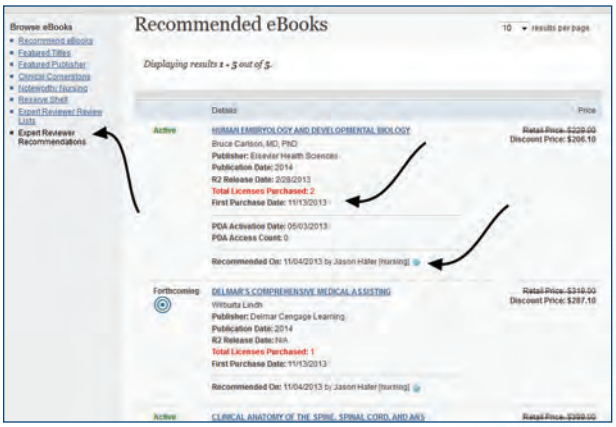


Review Lists

An Institutional Administrator may also create a list for an Expert Reviewer to evaluate for recommendations. The Expert Reviewer will receive an email notification once the Institutional Administrator has created the Review List and can access these lists via the “Expert Reviewer Review Lists” link along the left navigation pane.

Clicking any Review List Title will take the Expert Reviewer to the Review List. The Expert Reviewer is now able to Recommend for Purchase as described above.





To view recommended titles, the Expert Reviewer can click the “Expert Reviewer Recommendations” link on the left navigation pane. Here, the Expert Reviewer will see all recommended titles, the date of recommendation, user information and notes. Account purchase and patron-driven acquisition history is also shown.
